DELHIA GBELIDJI

WEB DEVELOPER

As a front-end developer specialising in React and TypeScript, I've developed a strong sense of curiosity, autonomy and initiative. I like to put these skills to good use in the teams I work with, contributing to stimulating and innovative projects.

SKILLS

- **Languages and frameworks**
  TypeScript, React, Next.js, Node.js
- **Version management tools**
  Git, GitHub
- **Development environments**
  Visual Studio Code, PhpStorm
- **Design and prototyping**
  Figma, Canva
- **Project management**
  Jira, Notion
- **Environments**
  Linux, MacOs
- **Other**
  Docker, Insomnia
- **Languages**
  English (fluent)

HOBBIES

- Swimming, running, climbing
- Cooking and baking
- Reading : thrillers, french classics
- Writing: poetry and novels

EXPERIENCES

Frontend developer | CDD

TEAMOTY
APRIL TO SEPTEMBER 2024

Following on from my first contract, I have continued and deepened my missions within the frontend team. I contributed to the continuous improvement of code and processes, while strengthening the documentation of best practices to promote a structured and efficient development environment.

Frontend developer | Apprenticeship contract

TEAMOTY
FEBRUARY 2023 TO MARCH 2024

As part of an agile team, I contributed to the design and development of JavaScript functionalities for the Scheduling software, used to manage construction sites.
I then helped redesign the software by developing new features in React. As a member of the React team, I helped harmonise the code to ensure compliance with best practice and optimised performance. I also documented the team's standards, conventions and best practices to ensure consistency and facilitate collaborative working.

EDUCATION AND DEGREES

Ada Tech School | 2022 - 2024

CONCEPTEUR DÉVELOPPEUR D'APPLICATIONS, LEVEL 6

During this training, I had the opportunity to work on various group projects, such as a retro video game in LUA, a Chrome extension in JavaScript, an e-commerce site using React, Express, MongoDB and Node.js, and a mobile application in Swift. I gained my professional qualification thanks to the design and development of a personal project, **READ-it,** built in Next.js/Nest.js. This project allows you to visualise, manage and follow the various stages of your book publishing process.

Université Sorbonne Nouvelle | 2018-2022

LICENCE EN LETTRES MODERNES ET COMMUNICATION

Maison d'Education de la Légion d'Honneur | 2013-2016

BACCALAURÉAT SCIENTIFIQUE, MENTION TRÈS BIEN
